

will provide at least an equivalent level of safety. Under the Safety Plan, train operators must receive formal certification to operate on the TRAX System and must receive an annual recertification, or be re-certified as required in response to rules, violations and long-term absences from the system. See Exhibit G. Train operator training is a four-week course combining classroom and field training. Subjects includes rules, standard operating procedures, emergency operating procedures, light rail vehicle orientation, light rail vehicle troubleshooting, system orientation, and communications. Train operators must pass written and field tests to successfully complete the course. In addition, the TRAX operating rules call for a system of discipline, leading to possible decertification for train operators who violate operating rules.

Interested parties are invited to participate in this proceeding by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with either the request for a waiver of certain regulatory provisions or the request for an exemption of certain statutory provisions. If any interested party desires an opportunity for oral comment, he or she should notify FRA, in writing, before the end of the comment period and specify the basis for his or her request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number FRA 1999-6253) and must be submitted to the DOT Docket Management Facility, Room PL-401 (Plaza level) 400 Seventh Street, SW, Washington, DC 20590. Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning this proceeding are available for examination during regular business hours (9:00 a.m.-5:00 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's Web site at <http://dms.dot.gov>.

Issued in Washington, D.C. on September 27, 1999.

Michael Logue,

Deputy Associate Administrator for Safety Compliance and Program Implementation.

Federal Railroad Administration

[Docket No. FRA-1999-6070]

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to Title 49 Code of Federal Regulations (CFR) Part 235 and 49 U.S.C. App. 26, the following railroads have petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR Part 236 as detailed below.

Docket No. FRA-1999-6070

Applicant: Burlington Northern and Santa Fe Railway Mr. William G. Peterson Director Signal Engineering 4515 Kansas Avenue Kansas City, Kansas 66106.

Burlington Northern and Santa Fe Railway seeks approval of the proposed annual modification of the signal system for winter operation, on the two main tracks, between milepost 1151.74 and milepost 1152.34, near Marias, Montana, on the Montana Division, Hi Line Subdivision. The proposed changes consist of the following, on an annual basis, during winter operations:

1. Temporarily spike, clamp, and disable switch controls in field for power-operated double crossover switches;
2. Temporarily discontinue and turn to the field, the westbound home signals at Marias; and
3. Temporarily extend the OS out to the existing westbound repeater signals, remove the number boards from the westbound repeater signals, and in effective convert the westbound repeater signals to the new westbound home signals.

The reasons given for the proposed changes are that during winter operations it is impossible to keep switches clear of snow, causing train delays due to switches being out of correspondence, and the potential for unsafe air loss associated with stopping on a 1.66 percent grade can be prevented.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and contain a concise statement of the interest of the Protestant in the proceeding. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

All communications concerning this proceeding should be identified by the docket number and must be submitted to the Docket Clerk, DOT Central Docket Management Facility, Room PI-401, Washington, D.C. 20590-0001. Communications received within 45 days of the date of this notice will be considered by the FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9:00 a.m.-5:00 p.m.) at DOT Central Docket Management Facility, Room PI-401 (Plaza Level), 400 Seventh Street, S.W., Washington, D.C. 20590-0001. All documents in the public docket are also available for inspection and copying on the internet at the docket facility's Web site at <http://dms.dot.gov>.

FRA expects to be able to determine these matters without an oral hearing. However, if a specific request for an oral hearing is accompanied by a showing that the party is unable to adequately present his or her position by written statements, an application may be set for public hearing.

Issued in Washington, D.C. on September 27, 1999.

Grady C. Cothen, Jr.,

Deputy Associate Administrator for Safety Standards and Program Development.
